

### **IYMC – Lucknow**

Our school team got an opportunity to participate in 7<sup>th</sup> International Young Mathematicians Convention 2016 held at City Montessori School Lucknow from 2<sup>nd</sup> December to 5<sup>th</sup> December 2016, in which 36 International Teams from 17 different countries, 25 teams of different states and 17 schools from Lucknow participated.

The Technical team which conducted the various math competitions were Dr. Simun chua, President MTG Philippines, Professor wen hsien sun, President Q chang Mathematics Education, Taiwan and Dr Mark soul, New York university USA.

Some countries were really very good like Philippines, Taiwan and Vietnam.

Our team was just behind them and ranked second.

In separate meeting of team leaders and The technical committee, I got really very good and innovative ideas from De. Mark Soul, which I will share with my colleague teachers to improve our way of teaching specially Maths.

The hospitality of CMS Lucknow was really appreciable. They made this International event successful. They were always ready to extend to a helping hand with a pleasant smile. Our students were able to bag the silver & bronze medal in team & individual events both.

This competition will be held again in 2018 and we are going to try to win the gold medal this time.
